NEW COURSE

ANATOMICAL BASIS OF RESTORATION & REJUVENATION OF THE PERI-ORBITAL & PERI-ORAL AREA USING NON-SURGICAL INJECTABLE TREATMENTS.

Dr. Gabriela Casabona
Dermatologist (MD)

Mrs Sabrina Shah-Desai
Reconstructive & Aesthetic Oculoplastic Surgeon (MS, FRCS)

Dr. Francesco Bernadini
Oculoplastic & Orbital Surgeon (MD)

COURSE TITLE: ANATOMICAL BASIS OF RESTORATION & REJUVENATION OF THE PERI-ORBITAL & PERI-ORAL AREA USING NON-SURGICAL INJECTABLE TREATMENTS.

COURSE DATE: Saturday 26th Nov 2016

COURSE DESCRIPTION:

This “hands on” wet-lab is a scientific evidence based look at assessing and restoring complex peri-oral and peri-orbital areas. The course is run by industry recognised clinical and anatomical trainers, who are highly experienced in treating these areas with the aim of promoting safe aesthetic practice amongst medical professionals.

Delegates will get a comprehensive understanding of facial anatomical layers using fresh cadavers and prosections. They will practice anatomical surface marking on fresh frozen cadavers, with an emphasis on avoiding critical neurovascular anatomy in peri-oral and peri-orbital areas.

The “wet-lab” will cover basic, intermediate and advanced safe reproducible filler injection techniques for the most challenging facial areas, addressing how to improve the deep volume loss with appropriate fillers and reveal how to address the skin canvas.

They will also learn how to avoid complications from poor technique and inappropriate patient selection.

This one-day simulation “wet-lab” will provide small group, hands on practical training, so that delegates will be confident in peri-oral & peri-orbital anatomy, understand the concepts of surgical and dermatological assessment applied to non surgical treatments to improve assessment and deliver safe outcomes.

Cadaver based skills learning courses are recognised as one of the best ways to impart training before attempting these on a live patient, CPD accreditation applied for.

COURSE DIRECTOR:

Mrs. Sabrina Shah-Desai (MS, FRCS), one of UK’s leading Oculoplastic Surgeons specialising in surgical and non-surgical peri-orbital rejuvenation. She is an advanced trainer for Galderma and has developed “Eye-Boost” a bespoke tear trough rejuvenation treatment.

COURSE FACULTY:

Dr. Francesco Bernadini an internationally respected Oculo-Plastic Surgeon from Italy, who is a teaching professor of Ophthalmology & Plastic Surgery at the University of Genova and Visiting Professor at the University of Pennsylvania in Philadelphia. He is well-known for his anatomy knowledge and fat grafting techniques.

Dr. Gabriela Casabona is an expert Dermatological Surgeon from Brazil, who is a highly sought after international speaker for leading dermal filler companies in the aesthetic industry.

COURSE FEE: £1,495

Fee includes: lunch, all refreshments, teaching materials, headsets and a certificate of attendance.

ADDRESS: Dissecting Room, ANATOMY DEPARTMENT, Kings College London, 2nd Floor, Hodgkin Building, Guys Campus, SE1 1UL

START TIME: 9am
FINISH TIME: 5pm
